To Whom This May Concern:

With one masters' degree completed and another in the works, I have decided to consider teaching on a higher level of education. I taught for 12+ years in grades ranging from 5th through 12th and in various countries and states. Under my direction, the theatre program at Life Center Academy was created and thrived. Though I love my work, colleagues, and students, the need for additional finances has made me consider how my multiple degrees and experience can be used to benefit other educational facilities besides Life Center Academy.

Attached is a combined resume showing both my theatrical experience and my other occupational work. I am open to phone or face-to-face interviews.

Thank you for your consideration.

Sincerely,

Felicia Latoya Brown
